

FIRST AID

COOL A BURN

BURNS

Preventing burns is always the best solution. Watch out for hot ovens, hot curling irons, hot irons and hot water. Cool water, not ice water, can be used to cool the skin of minor burns. That is, burns similar to sunburn. Anyone receiving burns that are greater than a sunburn should always seek medical attention by dialing 911.

The Professor came home one evening and found some messages on his telephone answering machine. To find the messages -- and how the Professor answered them -- crack the secret code. You'll notice that each number on the telephone can stand for one of 3 letters. All you have to do is find the correct letter that each of the numbers in the secret message stands for!

WHAT YOU SHOULD DO IF YOU'RE

BURNED ACCIDENTALLY

1. 7UN 2OOL 8AP WA83R O8ER A 6IN6R 2U7N.
2. 6E8ER 2PPLY 2RE2M, 6I6TMENT 67 B88TER.
3. IF B54STERS FOR6 L32VE THEM AL66E.
4. 46 T6 A HO77ITA5 I3 T4E 2876 4S SE8E7E.
